

## **RELEASE AND DISTRIBUTION OF EVALUATION REPORTS**

The Commission on Technical and Career Institutions, upon invitation of the host school, assigns a visiting committee to develop an evaluation report based on the school's stated Philosophy and Goals and the Commission's Standards of Membership. The report developed is a privileged document forwarded by the Commission office to the chief executive officer of the evaluated school. Distribution of the report within the school's community and its availability for public consideration is a decision and responsibility of local school officials. We recommend that the institution distribute the report and the Commission's letters of notification to the superintendent of schools, to the state board of education, its board of control and to the general public

If the evaluation report is made available to the public, it must be released in its entirety.
